**Subject:** RE: Dewey Burdock Final Permits: Ready for Your Review

Hi all –

I finished my review of the Class III and Class V permits. I had very few comments overall, but would like to circle back on model calibration. I still have to review the summary of changes in the RTC, so I'll let you know if I have more questions on the permits after I review that, or if my questions are answered in that document.

Thanks,

Sarah

**Subject:** Dewey Burdock Final Permits: Ready for Your Review

Hi Darcy and Sarah: the attached versions of these permits are ready for our review.

Both documents show the revisions made since we re-issued these permits as draft in August 2019. The comments included are for your reference and have been resolved. We still need to include some record keeping requirements for documenting ESA mitigation activities (currently under ORC review).

After further changes are made following our review, we will resolve the formatting issues, update the Table of Contents, etc.

Thanks,

Douglas

Thanks Douglas – we are not yet reviewing the permits, is that correct?

**Subject:** FW: RTC status

Hi Darcy/Sarah: here's an update on what additional responses can be reviewed in the RTC. A Background/Introduction section has been added to the beginning of the RTC for your review as well.

I should have an update by tomorrow on what additional documents (e.g., EJ Analysis) will be ready for your review,

Douglas

**Subject:** RTC status

Douglas – I think you guys can review up through #187. There are a few things left to resolve, but it should mostly be ready for review up through there. 134 and 135 still haven't been reviewed, but you can review them if you would like.
